

# JCB-ID750

Original Instructions

# GENERAL WARNINGS & DISPOSAL

To reduce the risk of injury, the user must read the instruction manual.

This symbol is used throughout this manual to warn the user about potential risks. Please read & understand these sections before using the device.

Personal Protective Equipment (P.P.E.), such as ear defenders, eye protection, safety gloves and a dust mask, must be worn during the operation of the device.

The device must not be exposed to rain or immersed in water.

Do not allow any part of the device to come into contact with flames, or to catch fire.

This product has been marked with a symbol relating to removing electric and electronic waste. The product should not be discarded with household waste but must be returned to a collection system which conforms to the European Directive 2012/19/EU. It will then be recycled or dismantled in order to reduce the impact on the environment. Electric and electronic equipment can be hazardous for the environment and for human health since they contain hazardous substances.

The month and year of manufacture can be found within the product serial number e.g. MMYPPPAXXXXX. Where production month (MM) and production year (YY) are included.

# GENERAL POWER TOOL SAFETY WARNINGS

## **WARNING!**

**Read all safety warnings, instructions and specifications provided with this power tool.** Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury. **Save all warnings and instructions for future reference.**

The term “power tool” in the warnings refers to your mains operated (corded) power tool or battery operated (cordless) power tool.

### 1. Work area safety

- > **Keep work area clean and well lit.**  
Cluttered or dark areas invite accidents.
- > **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.
- > **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

### 2. Electrical safety

- > **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.
- > **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- > **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.

- > **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep the cord away from heat, oil, sharp edges or moving parts.**

Damaged or entangled cords increase the risk of electric shock.

- > **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- > **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

### 3. Personal safety

- > **Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- > **Use personal protective equipment. Always wear eye protection.** Protective equipment such as a dust mask, non-skid safety shoes, hard hat or hearing protection used for appropriate conditions will reduce personal injuries.
- > **Prevent unintentional starting. Ensure the switch is in the off position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

- **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
  - **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.
  - **Dress properly. Do not wear loose clothing or jewellery. Keep your hair and clothing away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.
  - **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.
  - **Do not let familiarity gained from frequent use of tools allow you to become complacent and ignore tool safety principles.** A careless action can cause severe injury within a fraction of a second.
- 4. Power tool use and care**
- **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.
  - **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
  - **Disconnect the plug from the power source and/or remove the battery pack, if detachable, from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
  - **Maintain power tools and accessories. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.
  - **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
  - **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.
  - **Keep handles and grasping surfaces dry, clean and free from oil and grease.** Slippery handles and grasping surfaces do not allow for safe handling and control of the tool in unexpected situations.
- 5. Service**
- **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

# TOOL SPECIFIC SAFETY WARNINGS

## 1. Safety instructions for all operations

- › **Wear ear protectors when impact drilling.** Exposure to noise can cause hearing loss.
- › **Use the auxiliary handle(s).** Loss of control can cause personal injury.
- › **Hold the power tool by insulated gripping surfaces, when performing an operation where the cutting accessory may contact hidden wiring.** Cutting accessory contacting a “live” wire may make exposed metal parts of the power tool “live” and could give the operator an electric shock.

## 2. Safety instructions when using long drill bits

- › **Never operate at higher speed than the maximum speed rating of the drill bit.** At higher speeds, the bit is likely to bend if allowed to rotate freely without contacting the workpiece, resulting in personal injury.
- › **Use a detector to locate lines in walls with concealed electric, water or gas lines. Avoid touching live components or conductors.** Inadvertant contact with hidden items may cause serious injury or damage to the tool.
- › **Always start drilling at low speed and with the bit tip in contact with the workpiece.** At higher speeds, the bit is likely to bend if allowed to rotate freely without contacting the workpiece, resulting in personal injury.

- › **Apply pressure only in direct line with the bit and do not apply excessive pressure.** Bits can bend causing breakage or loss of control, resulting in personal injury.

## 3. Safety instructions when using hammer mode

- › **Keep exposure to vibrations as short as possible. When carrying out work, always hold the hammer with both hands and ensure that you have a stable standing position.** Vibrations can injure the nerves in hands & arms.

# COMPONENT LIST

- 1. DRILL CHUCK
- 2. DEPTH GAUGE
- 3. DRILLING/ PERCUSSION DRILLING SWITCH
- 4. ROTATION DIRECTION SWITCH
- 5. LOCKING BUTTON
- 6. SPEED SELECTION WHEEL
- 7. ON/OFF TRIGGER
- 8. SIDE HANDLE

## TECHNICAL DATA

<b>Input Voltage</b>		230-240V~, 50-60Hz
<b>Power</b>		750W
<b>No Load Speed</b>		0-3000 rpm
<b>Hammer Impact Rate</b>		0-48000 bpm
<b>Chuck Capacity</b>		1.5mm - 13mm
<b>Max. Drilling Capability</b>	<b>Wood</b>	25mm
	<b>Steel</b>	13mm
	<b>Masonry</b>	13mm
<b>Product Weight</b>		1.9kg

## NOISE INFORMATION

<b>A-Weighted Sound Pressure (LpA)</b>	95 dB(A)
<b>A-Weighted Sound Power (LwA)</b>	106 dB(A)
<b>K<sub>pA</sub> &amp; K<sub>wA</sub></b>	3.0 dB(A)
<b>Wear ear protection when sound pressure is over 80 dB(A)</b>	

# VIBRATION INFORMATION

**Vibration total values (triax vector sum) determined according to EN 60745-1 and EN 60745-2-1**

<b>Impact Drilling into Concrete</b>	<b>Vibration Emission Value (<math>a_{h,1D}</math>)</b>	10.29 ms <sup>-2</sup>
	<b>Uncertainty (K)</b>	1.5 ms <sup>-2</sup>
<b>Drilling into Metal</b>	<b>Vibration Emission Value (<math>a_{h,1D}</math>)</b>	2.73 ms <sup>-2</sup>
	<b>Uncertainty (K)</b>	1.5 ms <sup>-2</sup>

## **WARNING!**

The vibration emission value of the power tool is tested under EN 60745-1 and EN 60745-2-1, and can vary during operation depending on the following usage conditions:

- How the tool is used and the materials being cut or drilled.
- The tool being in good condition and well maintained.
- Using the correct accessory for the tool and ensuring it is sharp and in good condition.
- The tightness of the grip on the handles and if any anti-vibration accessories are used.
- The tool being used as intended by its design and these instructions.
- The declared vibration total value may also be used in a preliminary assessment of exposure.

**THIS TOOL MAY CAUSE HAND-ARM VIBRATION SYNDROME IF USAGE IS NOT ADEQUATELY MANAGED.**

## **WARNING!**

To be accurate, an estimation of exposure level in the actual conditions of use should also take account of all parts of the operating cycle. These include times when the tool is switched off and when it is running idle but not actually doing work. This may significantly reduce the total exposure level over the working period, helping to minimize your vibration exposure risk.

- ALWAYS use sharp and undamaged bits, chisels, drills and blades.
- Maintain this tool in accordance with these instructions and keep well lubricated (where appropriate).
- If the tool is to be used regularly then invest in anti-vibration accessories.
- Avoid using tools in temperatures of 10°C or less.
- Plan your work schedule to spread any high vibration tool use across a number of days.

# OPERATING INSTRUCTIONS

## Intended Use

This impact driver is intended for drilling in stone, wood, metal, ceramics and plastics and percussion drilling in brickwork, concrete and stone.

The drill driver must not be modified or used for any other purposes than the ones described in these instructions.

## Attaching the Side Handle

- Push the side handle over the drill chuck and screw into place.

## Setting The Depth Stop

- Loosen the fixing securing the depth stop.
- Adjust the depth stop to the required offset.
- Tighten the fixing, ensuring the depth stop is securely fastened in place.

## Replacing Bits/Drills

 **WARNING!**

Never hold the chuck sleeve in one hand and run the tool to tighten or release accessories. This risks serious personal injury.

 **WARNING!**

Tool accessories can be very sharp and can become very hot during use - risk of personal injury.

- Open the chuck by holding the chuck sleeve in a firm grip and turning it anticlockwise until the chuck jaws open and the accessory can be inserted. The chuck is designed so that it can easily be tightened or released with one hand.

**NOTE**

The spindle locks automatically when the chuck stops rotating.

- Insert the accessory as far as it will go into the chuck. Point the tool up a bit, so that the accessory does not fall out.
- Tighten the chuck sleeve clockwise so that the accessory is clenched between the chuck jaws.

**NOTE**

Check that the accessory is straight, centred and not skew. If the accessory is not properly positioned it could fly out when starting the tool. Check that the chuck jaws rest on the flat surfaces of the accessory.

- Tighten the chuck all the way. Grip the chuck firmly and turn it clockwise.
- Tighten the rear sleeve of the tool mount using the drill chuck key.

## Power Switch

- Press the power switch to start the tool.

The tool has variable speed, a lock button for constant use, and a maximum speed selection dial:

## Variable Speed

- Press the power switch to increase the speed.
- Release it a little to reduce the speed.
- Release the power switch to stop the tool.

## Constant Speed

Activating the lock feature:

- Press the power switch gradually until it stops to increase the speed to maximum.
- Switch on the locking button.
- Release pressure on the power switch.

The tool is now locked at a constant speed without having to maintain pressure on the power switch.

To release the lock:

- Apply pressure to the power switch.
- The locking button will automatically release.
- Release pressure on the power switch.

The tool will come to a stop.

## Speed Selection Dial

Use the speed selection dial to pre-select the maximum rotational speed.

## Rotation Selector

### WARNING!

Only use the direction selector when the tool is stopped and the chuck is not rotating. Otherwise the tool can be damaged.

- Use the rotation selector to switch between clockwise rotation and anticlockwise rotation.
- Press the rotation direction switch to the left for rotation in a clockwise direction.
- Press the rotation direction switch to the right for rotation in an anticlockwise direction.

## Mode Selector

### Drilling Mode

### WARNING!

Use the correct specification of drill bit for the material and power tool you are working with. Incorrect selection may cause damage to the tool, workpiece or bit.

### NOTE

Check that the drill is correctly inserted and the chuck is properly tightened before starting the tool.

- If loose, clamp the work piece. The work piece should lie flat on a workbench, and/or be securely fixed.
- Mark out the position of the hole by suitable means.
- Use a suitable drill for your material.
- Ensure all drills are sharp.
- When drilling in metal, make sure that the drill is always sufficiently cooled with a non-flammable liquid.
- Start drilling at low speed.
- If you are drilling large holes, pre drill with a small drill and then finish off with a large drill.
- Do not force the tool - do not press too hard on the drill.

### NOTE

The drill can jam in deep holes. Release the power switch immediately if the drill jams. Switch to anticlockwise rotation and run the drill loose at low speed.

## Hammer Drilling Mode

- Set the mode selector switch to hammer mode to enable the hammer function. The hammer function allows more effective drilling into hard, brittle materials such as concrete, brick and stone.

## Maintenance

### **WARNING!**

Switch off the tool and disconnect the power (remove battery/unplug) before cleaning and maintenance – risk of electric shock and accidental start.

- Wipe the tool with a dry or damp cloth. Do not use a wet cloth. Do not use detergent that contains solvent or corrosive, abrasive additives – risk of damaging the surface.
- Keep the ventilation openings open – risk of overheating.
- Clear the tool vents and the accessory mount of dust and dirt after each use. Do not clean ventilation holes by inserting sharp objects in them, such as screwdrivers and other similar objects.
- Stubborn contamination in areas hard to access can be removed with compressed air (max 3. bar).
- Regularly check all fasteners, screws and bolts to make sure that they are tight. Tighten any loose screws immediately – serious injury could occur.
- If the power cord becomes damaged and replacement is necessary, this must be carried out by an authorised warranty agent.

### **WARNING!**

Never open the tool. The tool has no internal parts that the user can service or repair. Never try to repair the tool yourself. Take to an authorised service centre.

## Transport and Storage

- If the tool shall remain unused for any length of time, it should be stored in the original packaging.
- Store the tool in a dry, frost-free, well ventilated place with a temperature of no more than 40°C and out of the reach of children.
- Always Switch off the tool and disconnect it from the power supply (remove the battery/unplug the power cord) before transport.
- Always carry the tool using the purpose-designed handle.
- Always carry the tool using the purpose-designed handle.
- Ensure that the tool is not at risk of tipping over or exposed to vibration and shocks during transport, especially if the tool will be transported by car or other vehicle.

# WARRANTY STATEMENT

**JCB Power Tools are guaranteed against manufacturing defects for up to 5 years (extra charges may apply) from date of purchase by simply registering your product online within 30 days. Proof of purchase required. This does not affect your statutory rights.**

**To register your JCB Power Tool, please visit: [jcb-tools.com](http://jcb-tools.com)**

Online registration is required to receive a warranty certificate to activate your standard 3 year warranty. You will be given the option to extend to a 5 Year Warranty (extra charges may apply). Registration is only available online via [www.jcb-tools.com](http://www.jcb-tools.com). You will need your original sales receipt, the model number and the serial number (if applicable) of your product. Kits comprising of two or more tools are excluded from single registration and must be registered individually for full warranty cover.

Upon successful registration, a warranty certificate will be available to download, print or save as a PDF document. The relevant warranty certificate together with the original sales receipt will be required in the event of any claim within the warranty period..

Should you choose not to register your product within 30 days of purchase, your statutory consumer rights will not be affected. You will need the original sales receipt as proof of purchase in the event of a warranty claim.

Warranty cover commences from the date of purchase on the retail sales receipt and is valid only for JCB Tools products purchased within the UK bearing the CE mark and a visible serial number.

In the unlikely event your JCB Power Tool is subject to a manufacturing fault within the warranty period, JCB Tools may repair the product by replacing defective parts free of charge at our discretion. In the event parts are irreplaceable JCB Tools may replace your product free of charge. The original product will remain the property of JCB Tools in this situation.

**The above repair or replacement of products will be undertaken providing that:**

- The product has been subject to fair wear and tear only.
- The product has not been subject to accidental or cosmetic damage.

- The product has not been misused and has been used only in accordance with the instruction manual provided.
- The product has not been subject to overload or insufficient servicing and maintenance.
- The product has not been subject to any abnormal environmental conditions or inappropriate operating conditions.
- Repairs have not been attempted by an unauthorised person and no modifications have been made to the product.
- Repairs have not been undertaken using non-genuine spare parts.

JCB Power Tools used for Hire Fleets or as part of B2B and Service Contracts are not covered by these terms and conditions.

**JCB Tools standard 3 Year and extended 5 Year Warranties excludes the following (where relevant):**

- Components normally subject to wear such as carbon brushes.
- Batteries, Chucks and Chargers.
- Accessories and consumable items.
- Cases and tool storage products.

If your product develops a fault within 30 days of purchase, return it to the retailer where it was purchased together with your sales receipt. If a product develops a fault after 30 days a warranty claim must be submitted.

If you have a warranty claim please take your product, original sales receipt and if applicable, a copy of your extended warranty certificate to your place of purchase or nearest JCB Tools retailer.

If you wish to send your product to us directly, please call us on 03308380257 to arrange warranty claim or repair. Delivery and repair charges may apply at our discretion should the warranty claim be invalid for any of the reasons illustrated above. In the event charges are not accepted the product will be retained by JCB Tools and remain the property of JCB Tools.

The information on both your sales receipt and your extended warranty certificate must match.

JCB TOOLS WILL NOT BE LIABLE FOR ANY INJURIES OR CONSEQUENTIAL DAMAGES RESULTING FROM USE OF THIS PRODUCT.

# EC DECLARATION OF CONFORMITY

**We,**  
JCB Tools

**Declare that the product:**

*Description*

Impact Drill

*Type*

JCB-ID750

*Function*

Drilling and Percussion Drilling

**Complies with the following Directives;**

EC Machinery Directive

**2006/42/EC**

EC Electromagnetic Compatibility Directive

**2014/30/EU**

RoHS Directive

**2011/65/EU**

Standards conform to

**EN 55014-1:2017**

**EN 55014-2:2015**

**EN 61000-3-2:2014**
